

# Miro

## DESCRIPTION

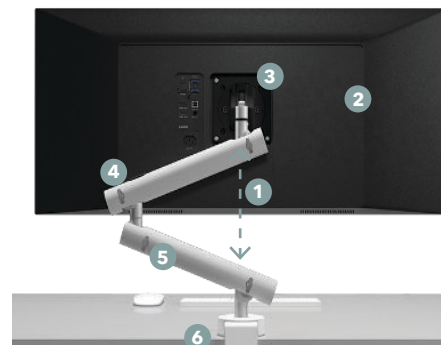

Miro is a sustainably-designed dynamic monitor arm, supporting flat and curved screens between 2 and 9 kgs.

## HUMAN-CENTRED DESIGN

Miro's patented design allows screens to be positioned precisely. Weightless fingertip adjustment helps facilitate collaboration and ergonomic excellence. With increasing screen sizes and desk space at a premium, Miro's True Vertical movement, small desk footprint and 180° stop mechanism, prevents colliding screens and tangled cables, for a healthy and productive workspace.

## KEY FEATURES

1. Synchronised upper & lower arms deliver pure vertical monitor motion.
2. Supports monitors weighing 2kg to 9kg, including curved screens
3. Innovative monitor head features safe and secure 'twist & lock' fixing.
4. Monitor weight gauge speeds installation and adjustment.
5. Integrated 4-point cable management.
6. Easy-to-fit top fixing C-clamp, to fit desk thicknesses of 16mm to 27mm.

15 Year  
Warranty

100%  
Recyclable

## SUSTAINABLE DESIGN

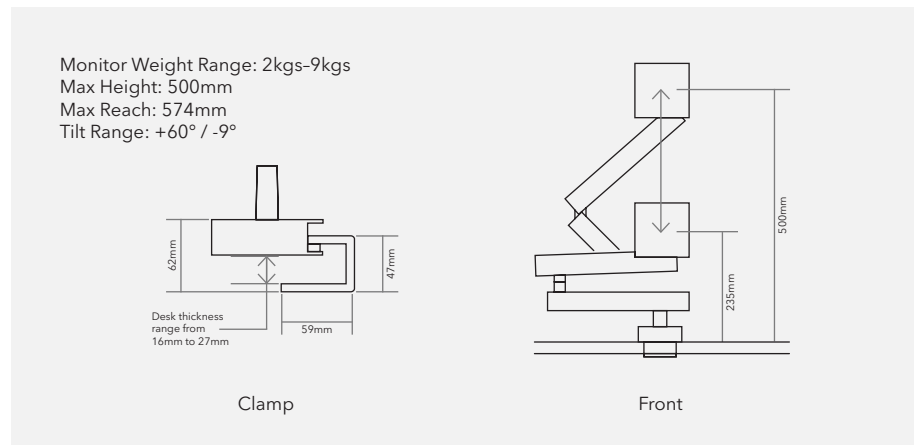

With Miro, sustainability is considered from start to end of its life. It is designed and manufactured in the heart of the UK with energy-efficient materials that give Miro up to 30% less embodied carbon than the market leaders.\*

Our 15-year warranty is backed by 4-million movement tests, to ensure reliability. At end-of-life, Miro is easily disassembled into 100% recyclable parts.

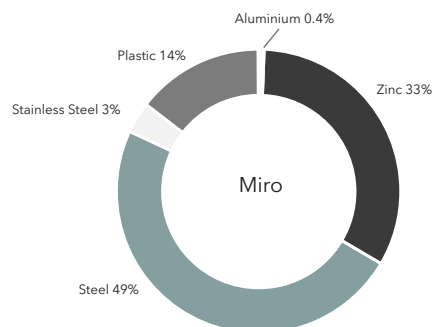

## QUICK AND EASY INSTALLATION

Miro helps you save time and takes the guesswork out of monitor installation. Simply set the weight of your monitor using the kilogram scale and attach the central clamp exactly where you want to position the middle of the screen. Slot on the monitor and twist to lock. There's no release lever to find or button to press, making it easy to do the job single-handed.

## DETAILS AND DIMENSIONS

## MATERIAL COMPOSITION

## ORDERING

Miro is available in fine textured black and white, with a top-fixing C-clamp included as standard. Talk to your account manager about support for ultra-wide curved screens.
